## Skills

| FRONTEND DEVELOPMENT: | JavaScript • TypeScript • ReactJS • NextJS • Redux • MUI • Tailwind • CSS • Sass • HTML |
| --- | --- |
| BACKEND DEVELOPMENT: | NodeJS • Express |
| MISCELLANEOUS: | SQL • MongdoDB • Jest • Cypress • Figma • AWS • Scrum Master (PSM1 certificate) |

## Projects

### Ecommerce TechStore with CMS   --> LINK                    (may 2023 - present)

- Built a **fullstack responsive** e-commerce page using latest **NextJS** utilities and **TypeScript.**
- Stored backend data in **MongoDB** and **AWS S3.** Styled with CSS Modules. Admin login with **Google API.**
- Styled front using **Styled Components (with SSR).** Implemented **Stripe** for payments.

### Personal blog template   --> LINK                          (feb 2023 - mar 2023)

- Built a **fullstack NextJS** blog using **dynamic routes** and **Markup language** to create well-formated posts.
- Styled with **CSS Modules,** mostly in simplistic style, but used a edelicate **parallax** effect. Designed to be **responsive**.
- Implemented fully functional contact form connected with MongoDB database.

### Dalle clone   --> LINK                                    (jan 2023 - feb 2023)

- Created a **fullstack ReactJS** web application for generating AI generated images using **OpenAI Api** (DALLE-2)**.**
- Stored data in **MongoDB** and images in **Cloudinary.**
- Built backend in **NodeJS** and **Express.**

### MyWallet   --> LINK                                       (jan 2023 - jan 2023)

- Built a  **ReactJS** web application for monthly budget management.
- Implemented **Chart.js** to visualize data and styled with MUI library and CSS modules.
- Introduced state management using **useReducer.**

### Crypto Coin Tracker   --> LINK                            (dec 2022 - jan 2023)

- Built a **ReactJS** single web application to track changes in cryptocurrency prices.
- Implemented a Coingecko **API** and **Chart.js** to fetch and display and visualize current data.
- Used **Context API** for global state management.

## Relevant Experience

### Strategic Project Manager   @Krowarzywa                   (may 2015 - aug 2022)

- Implemented a **cloud reporting system** for a chain of restaurants, enabling quick data collection and analysis.
- Introduced **agile workflow** and **Asana** to track project management progress in the team.
- Acted as a **Product Owner** to deliver **POS system** to a chain of restaurants and supervised the implementation process.
- **Managed company cloud**, i.e. data storage, users privileges, troubleshooting.

## Education

### University of Warsaw                                      (sep 2007 - jun 2010)

MA in Linguistics:  **Specialist translations** - English (legal and technical language )

## Interests
